Simple to Use

Food Safety and
Temperature Monitoring

When Food Safety is Your Responsibility

Our wireless temperature monitoring solution is perfect for commercial kitchens and food storage facilities: simple, reliable, and affordable

- Access real-time dashboards and charts on any connected device
- Analyse historical data for early fault detection and maintenance planning
- Receive email, SMS, and voice alerts as soon as temperature is out of range
- Easily add annotations to alert events
- Detailed and automated audit reports streamline compliance obligations
- Sensors accurate to 0.5°C and can be calibrated for even more accuracy

LoRaWAN is a cutting-edge, wireless network that boasts extremely long-ranges with low power and data requirements. A single internet connected LoRaWAN gateway can connect hundreds of sensors to the cloud!

Telemetry2U provides a comprehensive suite of plug-and-play products and services that leverages the power of LoRaWAN for various applications.

Cloud connectivity made simple and affordable with unlimited applications

Contact us for more information!

Protect your assets 24/7 with E-mail, SMS and voice alerts. Streamline compliance with automated audit reports

Cloud Connect Sensors With A LoRaWAN Gateway

Quality & Reliable Sensors with Simple Installation

The Dragino LTH65N temperature and humidity sensor can be placed directly inside fridges and freezers with measurements accurate to more than 0.5°C.

- Very simple to setup on our IoT platform
- One gateway can connect hundreds of sensors to the cloud
- Sensors can achieve 10Km range outdoors and hundreds of meters indoors
- Can be used with a standard USB powerbank to provide battery backup
- Works with a huge range of sensors for many types of applications

- Extremely simple setup and installation
- External sensor can be mounted in a thermal buffer to reduce false alerts.
- Battery can last for up to 10+ years and is easy to replace
- Can be calibrated at a NATA facility for more accuracy and a certificate
- Data automatically recovered from memory following unplanned outages

All Inclusive IoT Platform No 3rd Party Services

Connecting devices to our IoT Platform is easy, you'll be up and running in no time.

- Start off with a free 14-day trial.
- Adding devices is simple. Pay for what you use – no automated payments
- Use a smartphone to view real-time data on customised dashboards
- You're in complete control. Invite and configure unlimited users
- Loads of documentation and examples to help you get started quickly
- Friendly and helpful support
